Impressive at first with it's animated backgrounds, it becomes quickly repetitive. But it's still a good match 3. DONT DO IT just back away and forget u saw anything, it's seriously that bad (cringe). Really wonderful game. I somehow got bored of open-world RPG's and stupid filler sidequests and micromanagement and crefting, so I was looking for something that stimulates my imagination a bit more and is story-driven. I tried a few text-based games but they didn't do it for me, they were too daunting and tedious. This one has a perfect balance though. It's wonderfully written, but is also written in a straightforward way and you can read diagonally often if you're in a hurry. The story makes this, in my opinion, one of the best RPG's ever. I think it beats Baldur's Gate in terms of story and that is saying something. The art is also beautiful (albeit not abundant) and while the fighting mechanics aren't really that complex/great, fights (which do not happen too often) have a very real feeling (due to the text) and are quite challenging. The swindlestone game is also a nice addition (better than Gwent imho). Anyway, all in all one of my favorite RPG's of all time. I do not think this game will have a wide appeal for everyone, but for people who like reading fantasy this is a must own.. i really like this game but there is a big minus you can die really easy you almost have no health or the enemy is too strong or you always get empty of healing stuff besides all of that i really like this game.. For diehards only. Still doesn't explain why Big Alex always won, though.. I am the composer for the game yet my review will not be biased*

I was a fan of the first Chibi Knight and played the crap out of it. Super Chibi Knight is bigger, longer, and cuter! One can easily enjoy many hours of gameplay and with two different hero path's to take, it has replayability.. I've only been playing for a few hours, but I'm going to say this game is jam-packed with content. From the sim games and city builders I've played, I'd say it's a cross between Offworld Trading Company and Rollercoaster Tycoon. I haven't really played many Civ game or Capitalisim, but if other comments are saying that, then they're probably right.

I'm relatively not-so-great at games involving stock markets, so I'm not so knowledgeable in that respect. But I like the research trees and economics. Pretty interesting if you're into the way business works.

Visually dull, unengaging, repetitive garbage game.. Best Birthday Present Ever.. this so funnnnnnnnnnnnnnnnnnnnnny!!!!!!!!!!!!!!!!!!!!!! Unfallen achievement is too difficult. Wow that Holographic Vision by Julius Horthuis!!!!!!!!!!!!. Great little game! Can't wait for the full release.. This game is incredibly fun, and has many different things for you to do. If you prefer setting up scenarios by yourself or watching things explode, you can play the singleplayer. On the other side of the coin, you can play mulitplayer, which consists of community - made city role-play servers, racing servers, and servers relating to the built-in battle and zombies modes. While my poor connection to these servers limits what I can do, it's still a very fun experience. I would definitely recommend this for anyone that's interested.

. This game is straight. Nothing about this game is wack forreal. Its worth the money. I just expected it to be a good beat em up. I proved to be so much more. I am a fan Jetdogs Studios games. Among the Heavens is rather different than the normal games I've played by them. It is another version of Diner Dash. I adored Diner Dash, played them all, and when I expected a match three type game and a Diner Dash style popped up I was pleasantly surprised. I enjoyed the games flow. The only thing I think seemed out of place was the actual Match 3 puzzle. It popped up, you played it for boost, yet playing it fell flat. There was no real pizazz behind it. It felt like an after thought to throw in to attract a broader audience. If another Among the Heavens is released, I would love to see something more done with the match 3 or replace it with a better mini game.

Beside that little con, the rest I loved, then again I enjoy games along the Diner Dash style. It is repetitive, difficulty goes up, and you grind through it. Achievements are very attainable which I like. You can achieve these halfway through the game. The graphics are nice, music is okay however like most games I turn it off and play my own.. A bit buggy here and their and spectating your friends is very off. The ball goes anywhere and doesn't always show where it actually is. A very fun game besides that with people, it would be lonely alone though. Hints the "with friends" part. :(
